Brands I've worked with

Few words about me

My career began as the founder and director of a Brand Design & Strategy studio, where I partnered with SMEs and entrepreneurs to build impactful brands, unlock business growth, and create digital experiences that delivered measurable value. Leading client engagements from strategy through execution allowed me to develop a strong commercial foundation across business development, sales, marketing, branding, web design, and project leadership.

Over the years, I have worked with a diverse portfolio of organisations across finance, hospitality, real estate, technology, HORECA and FMCG, including Stoli, Muskita Hotels, JCC Payment Systems, Hellenic Bank, Aristo Developers, Cheeseline, ADS Securities, Prevention at Sea, and Infocredit Group just to name a few.

Currently shaping the digital product experience at Remazing Group, designing User Experiences across our B2B proprietary digital e-commerce platform Remdash, with business-focused approach to product design, combining user-centred thinking with commercial objectives to craft experiences that drive both client value and business outcomes to industry-leading global brands such as Corsair, Samsung, L'Oreal, Kenvue, Kelloggs, Leifheit, Henkel, NIVEA, and many more.
